SUMMARY

iOS developer focused on on-device AI/ML — building native Swift apps where models, sensors, and spatial computing run entirely on the phone, with no server to offload the hard part to. Across five shipped projects (bioacoustic monitoring, AR games, LLM inference, and privacy-first scheduling) the throughline is the same: treat latency, battery, and privacy as the actual design problem, not an afterthought.

EXPERIENCE

Apple Developer Academy

Mar. 2026 – Present

Junior Developer

Bali, Indonesia

- Shipped native iOS products end-to-end in a challenge-based program — from design through TestFlight and a public showcase
- Built for on-device constraints: latency, battery, and privacy, with **no cloud inference**

PROJECTS

Coralyst | *Python, Core ML, Swift/SwiftUI* | [GitHub](#) [Prototype](#)

- On-device bioacoustic ML for Biorock Indonesia — detects blast fishing fully offline; Core ML model logs timestamped detections and reef-health cues

Revenants | *Swift 6, ARKit, RealityKit, RoomPlan, Core Haptics, VIPER* | [GitHub](#) [TestFlight](#)

- Asymmetrical co-op AR horror game with LiDAR room scanning and a custom Bonjour protocol over Network.framework; spun out [RealityAudio](#) (featured by [DevBytes](#))

Who's Out | *SwiftUI, Foundation Models, EventKit, Core Location, Spring Boot* | [GitHub](#) [TestFlight](#)

- IndeHub WWDC26: privacy-first, on-device availability reasoning over calendar / location / Focus; E2E-encrypted friend sync; Siri via iOS 27 App Intents

Rush Hour | *SwiftUI, FamilyControls, DeviceActivity, Shield, WidgetKit, AVFoundation* | [GitHub](#) [Site](#)

- Focus app with Screen Time blocking and session timelapse; Academy showcase, then a pre-App Store pass from real user feedback (139 commits)

Sema | *Gemma 4, llama.cpp, MediaPipe, Swift/SwiftUI* | [Kaggle writeup](#)

- Offline KSL ↔ English/Swahili interpreter on iPhone — Gemma 4 (E2B) via llama.cpp for the Gemma for Good Hackathon

ACHIEVEMENTS

1st Place — Cursor Bali Hackathon

Finalist — National Geo AI Hackathon, IIT Bombay Techfest

AIR 3 — AlgoUtsav 2025, NIT Rourkela

Kaggle — Dataset Expert & Notebook Expert

EDUCATION

BITS Pilani

3rd Year

Bachelor of Science in Computer Science

CGPA: 8.54/10

SKILLS

Languages : Swift, SwiftUI, Python, Java (Spring Boot)

Apple : Core ML, ARKit, RealityKit, RoomPlan, Core Haptics, Foundation Models, App Intents, FamilyControls, DeviceActivity, WidgetKit, EventKit, Core Location, Network.framework, AVFoundation

ML / Tools : llama.cpp, Gemma, MediaPipe, Git, Xcode, SPM, Kaggle
