EXPERIENCE

Apple Developer Academy

Mar. 2026 – Present

Junior Developer

Bali, Indonesia

- Build native iOS that other people actually use: TestFlight, Academy showcase, iteration with design and product
- Comfortable on Apple platforms: SwiftUI, Swift 6, SPM, App Intents, WidgetKit, Xcode

PROJECTS

Who's Out | SwiftUI, REST, Spring Boot, App Intents | [GitHub](#) TestFlight

- Internal-tool shape: availability dashboard, not a feed — REST APIClient, auth refresh, Keychain, E2E CryptoKit
- Siri / App Intents and WidgetKit so the same data shows up outside the app; KismetTests unit-test target

RealityAudio | Swift Package, Swift 6 | [GitHub](#)

- Reusable library with a public API and Swift Testing — the habit of extracting shared code instead of copy-paste

Rush Hour | MVVM, SwiftUI | [GitHub](#)

- MVVM screens, AVFoundation capture, Screen Time APIs, WidgetKit — shipped at a public Academy exhibition

Revenants | VIPER + SwiftUI, Swift 6 | [GitHub](#)

- Layered architecture (VIPER) so views never talk to ARKit or Network.framework; TestFlight
