EXPERIENCE

Apple Developer Academy

Mar. 2026 – Present

Junior Developer

Bali, Indonesia

- Ship native iOS features end-to-end — SwiftUI screens, REST clients, TestFlight — in a challenge-based program
- Work with product and design on user-facing flows (availability, session status, encrypted sync) under real device constraints

PROJECTS

Who's Out | SwiftUI, URLSession, Spring Boot, CryptoKit | [GitHub](#) TestFlight

- Built a mobile dashboard for friend availability: on-device Foundation Models over calendar/location, REST actor APIClient (Bearer auth, refresh, retries)
- E2E CryptoKit sync so the Spring Boot API only stores ciphertext; tokens and keys in Keychain; unit-test target KismetTests

Rush Hour | MVVM, SwiftUI, AVFoundation | [GitHub](#)

- MVVM screens with @MainActor view models; camera capture via AVCaptureSession; WidgetKit status; Academy showcase with real users

Revenants | Swift 6, Network.framework, VIPER | [GitHub](#)

- Custom Bonjour wire protocol on Network.framework; main-actor isolation + bounded send queue so a backed-up network cannot stall the UI

ACHIEVEMENTS

AIR 3 — AlgoUtsav 2025 **Meta Hacker Cup 2025** — Global Rank 1,623 **1st** — Cursor Bali Hackathon
Finalist — National Geo AI Hackathon, IIT Bombay Techfest **Kaggle** — Dataset Expert & Notebook Expert

EDUCATION

BITS Pilani

Expected 2028

Bachelor of Science in Computer Science

CGPA: 8.54/10 · 3rd year

SKILLS

Mobile : Swift, SwiftUI, MVVM, URLSession, REST, Git

Backend (used in Who's Out) : Java, Spring Boot, JSON APIs, auth / token refresh

Also : Swift 6 concurrency, CryptoKit, Keychain, WidgetKit, AVFoundation, Core ML
