## EXPERIENCE

---

### Apple Developer Academy

Mar. 2026 – Present

#### Junior Developer

Bali, Indonesia

- Ship Swift + SwiftUI consumer apps to TestFlight; work with design on messaging-adjacent flows (availability, pairing)
- Own networking and secure storage — URLSession, Keychain — not just UI

## PROJECTS

---

### Who's Out | SwiftUI, URLSession, Keychain | [GitHub](#) TestFlight

- Friend coordination app: SwiftUI screens, REST actor APIClient (auth, refresh, retries), tokens and keys in Keychain
- CryptoKit E2E so the server stores ciphertext; Siri / App Intents; unit-test target

### Rush Hour | SwiftUI, MVVM | [GitHub](#)

- MVVM + SwiftUI; @MainActor view models; WidgetKit; public Academy showcase

### Revenants | Swift 6, Network.framework | [GitHub](#)

- Realtime peer networking (Bonjour + custom protocol) with main-actor isolation so UI never blocks on the wire

### RealityAudio | SPM, Swift 6 | [GitHub](#)

- Published Swift package other apps can import; Swift Testing suite
